DETAILED ACTION

Remarks

1. Applicants' Amendment filed on April 13th, 2009 is acknowledged. Claims 7 and 13 have been amended. Accordingly, claims 7-15 are pending in the present application.

Allowable Subject Matter

2. Claims 7-15 are allowed over prior art of record and renumbered as 1-9, respectively.

Reasons For Allowance

3. The following is an examiner's statement of reasons for allowance:

After further search and consideration of Applicants' response filed on April 13th, 2009 (see Applicants' argument in page 5, line 20 to page 6, line 9 of the April 13th, response), it is determined that the prior art of record neither anticipates nor renders obvious the claimed subject matter of the instant application as a whole taken alone or in combination, in particular, prior art of record does not teach "patterning the control gate layer, the dielectric layer, the floating gate layer and the tunnel oxide layer to form a stack gate on the cell region and a gate including the control gate layer and the dielectric layer on the distinct peripheral region", as recited in the independent claims 7 and 13, respectively.

Claims 8-12 and 14-15 also allowed as being directly dependent of the allowed independent base claims.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - Dejenfelt et al. (U.S. Patent 6,265,266) disclose a two-transistor flash EPROM cell for high-speed high-density PLD applications.
 - Lee et al. (U.S. Patent 6,235,585) disclose a method for fabricating a flash memory device including forming a tunnel oxide film and a peripheral oxide film on a cell and peripheral areas of a semiconductor substrate.
